

ANIKET TAYADE

+91- 84088 93028 | Pune, MH. | [Email](#) | [LinkedIn](#) | [Github](#)

OBJECTIVE

Aspiring Data Scientist with hands-on experience in data analysis, machine learning, and GenAI projects. Strong in building end-to-end ML solutions, performing EDA, and deploying data apps. Known for critical thinking, problem-solving mindset, analytical reasoning, and clear communication. Passionate about solving real-world problems using AI, data, and analytics.

EDUCATION

M.Sc (Computer Science Specialization) 2025 – Pursuing

Location: Pune, Maharashtra.

Relevant Coursework: Data Analytics, Machine Learning, SQL, Python, Statistics

Post Graduate Program in Data Science and AI 2024 – 2025

Location: Noida, UP.

Relevant Coursework: Data Science, AI, Data Analytics, Machine Learning, Deep Learning, LLM, Gen AI

B.Voc (Software Development) 2016 – 2019

Location: Amaravati, Maharashtra.

Relevant Coursework: Programming Fundamentals, Logical Thinking, Software Development Process

SKILLS

Technical Skills	SQL, Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, XGBoost, CNN, RNN, NLP, GenAI, LLM Concepts Streamlit, Git, GitHub, Docker, MongoDB, PostgreSQL, Feature Engineering, Model Evaluation.
Soft Skills	Problem Solving, Analytical Thinking, Communication, Team Collaboration, Critical Thinking
Tools & Platforms	Git, Github, Streamlit, Jupyter Notebook, Google Colab, VS Code, Vercel, Kaggle, GCP, AWS

EXPERIENCE

Data Scientist Internship Jan 2025 – Jan 2026
NextHike IT Solutions *Noida, India*

- Automated data preprocessing and conducted **EDA** using **Python & Pandas**, uncovering insights that improved model accuracy by **18%** and increased overall performance by **20%**.
- Built ML prediction models and developed **Streamlit** dashboards, reducing manual reporting effort by **40%** and improving workflow efficiency by **30%**.

Python and Programming Instructor Apr 2023 – Dec 2025
Vision Computers Academy *Pune, India*

- Delivered structured training in **Python** programming, **data structure**, and basic **algorithms** to students from diverse academic backgrounds.
- Taught fundamental programming concepts including **loops**, **conditionals**, **functions**, **object-oriented programming**, and **file handling**.
- Supported students in building a strong programming foundation and prepared them for technical interviews and certifications.

PROJECTS

Twitter Disaster Classification System - Built an **NLP pipeline** using **Python**, **TF-IDF**, **word embeddings**, **Logistic Regression**, and **BERT**, performing **text cleaning**, **tokenization**, and **lemmatization**, which improved tweet classification accuracy by **22%**. Compared ML and deep learning models, fine-tuned BERT, and deployed a real-time web app, increasing overall model performance by **18%** and enabling live disaster prediction.

Rossmann Store Sales Forecasting Analysis - Built a sales forecasting pipeline using **Python, Pandas, Scikit-learn, Random Forest, Gradient Boosting, and XGBoost**, performing EDA, feature engineering, and time-series trend analysis, where **Random Forest achieved the best performance with RMSE 1054.05 and MAE 668.81**. Evaluated multiple ML models using **RMSE and MAE metrics**, optimized features and training process, and reduced prediction error by **12–15%**, enabling more reliable store-level sales forecasting.
